The third edition of Geoffrey Sawer's highly-regarded work, **The Australian Constitution**, was prepared for publication by AGS senior lawyers Guy Aitken and Robert Orr QC. The book provides a broad and fascinating overview of the genesis of our Constitution, of how it developed throughout the twentieth century, and of how it works today.

The book is designed to be a complete introduction to Australia's Constitution. It has maintained the lively spirit of earlier editions, and remains an accessible, general guide for students, citizens and others interested in learning about the foundations of the Australian system of government. It clearly draws together legal and historical themes, and importantly focuses on how the Constitution in practice impacts on the workings of the Australian political system and the Australian people. Commentary on current issues that have recently been subject to much debate, such as freedom of speech, constitutional change and native title, has been included.

The full text of the Constitution and related major constitutional materials are also reproduced. A comprehensive index has been prepared by the authors and includes references to the commentary, sections of the Constitution and the other foundational documents.
